**All about**

**Aqueous Pigment Dispersant**

**Xicare™ Dispersants** enable water-based emulsions for daily wear SPF and color cosmetic formulations. The **Xicare Copolymer** disperses untreated metal oxides in the water phase which eliminates the need for synthetic, oily, or heavy dispersants. Thereby supporting personal care market trends, such as efficient manufacturing and silicone-free ingredients.

**Xicare Dispersants** allow for even coverage and less white cast in sun care, while providing an improved and lightweight feel for all day wear.
